## Industrial Communication

## COMSOFT – is making the link

COMSOFT has been successful in the field of industrial communication for more than 30 years. We realize individual concepts, look for the best solutions and supply you with powerful and flexible products.

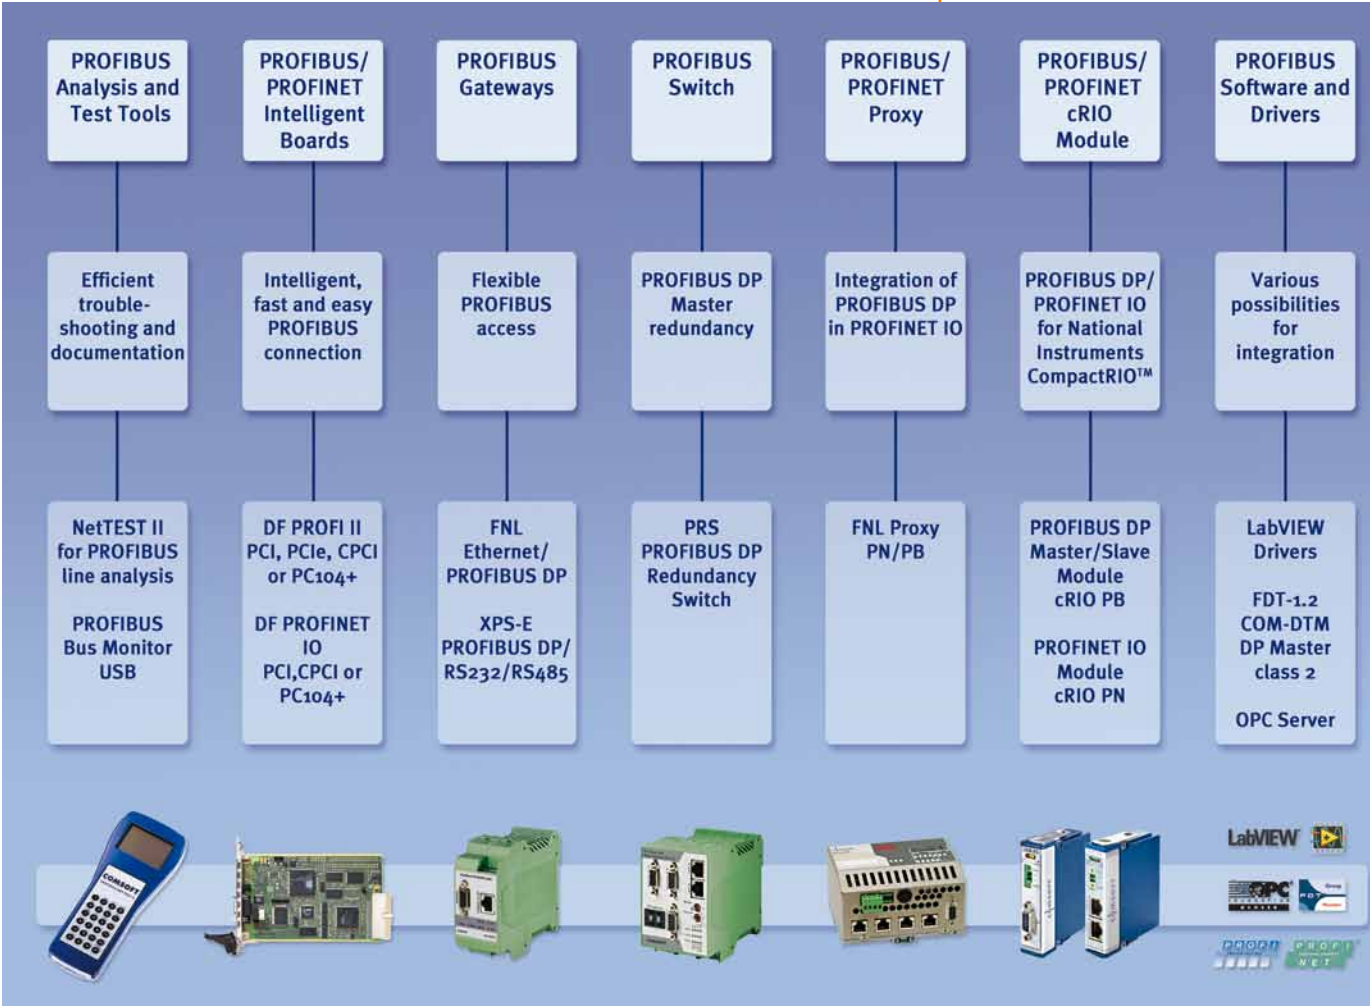

The company currently has 260 highly qualified engineers and professionals divided into two main business sectors: Air Traffic Control (ATC) and Industrial Communication Products (ICP).

As a declared PROFIBUS and PROFINET IO specialist, the business sector ICP develops and manufactures products for a wide variety of communication applications as well as provides the implementation, maintenance and diagnostics.

# Our Solutions

Our product range today includes components, services as well as individual specific solutions for PROFIBUS and PROFINET IO.

The graphic below shows a selection of our product range. We will be pleased to send you our latest product catalogue including all of our products. You are welcome to visit our homepage [www.comsoft.de](http://www.comsoft.de).

# Our Approach

## CUSTOMER ORIENTATION

As our customers' partner our responsibility does not cease with the delivery of our products. For us, service stands for competent and comprehensive care and includes setting into operation, maintenance and support. We are a full service supplier. An excellent relationship with our customers is our key element of success.

## RELIABILITY

Your needs are urgent. Once the timetable has been agreed, COMSOFT will start turning your requirements into consistent solutions right away.

We constantly focus on innovation, environmental awareness and adaptability of the delivered technology.

## FLEXIBILITY

COMSOFT does not belong to the big players in the automation sector. Yet we consider this to be an advantage. Our decision making process is efficient. Our response times are short and allow us to work in close cooperation with you, our customer.

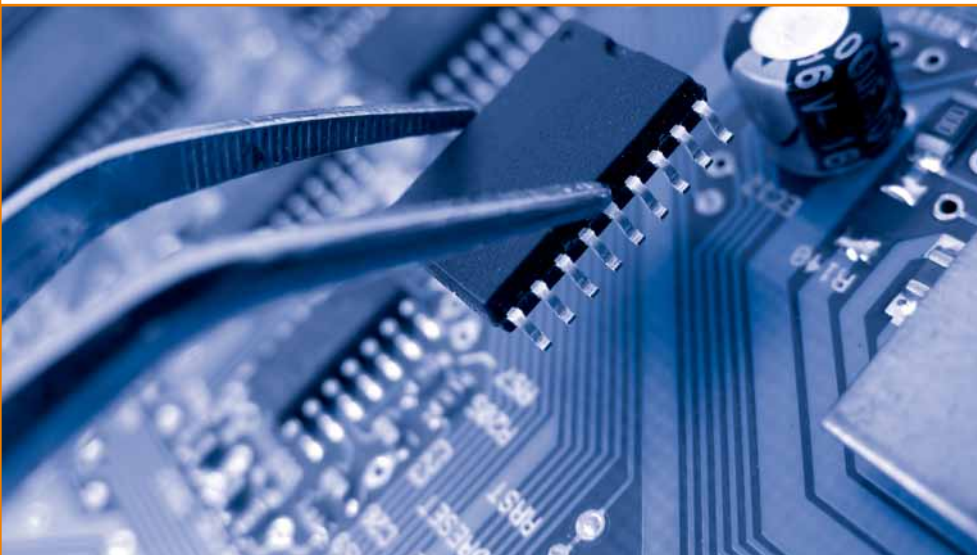

COMSOFT's activities in the field of development, quality, sales and

service are consequently focused on customers and partners. This is the only way to develop and implement solutions in line with market needs.

Constant exchange of views and experience within and beyond the company creates synergies and results in convincing, extraordinary solutions.

## STANDARDS & QUALITY

We know about the importance of quality control. COMSOFT was awarded the ISO 14001 certificate in 2009 and has also held continuous ISO 9001 accreditation since 1993. Constant quality control is a key factor in our company and shapes our approach to work. Our participation in defining evolving standards in international working groups is a reward for past achievements as well as a motivation for the future.

# References – say more than a thousand words

References confirm our service capability, the sustained satisfaction of our customers and guarantee the quality of our current products. A selection of customers shows the spectrum of industrial sectors in which we are operating.
